「增加提昇，精益求精」

一 增加學問修養是致勝之道

「益」是增加與提昇。一般人希望增加的，多半是物質財富，希望提昇的，多半是名譽地位。然而，這絕非智者所為，也不是益的本意。人最需要增加的，是學問，最需要提昇的，是修養。人應該見賢思齊，通過學習別人的長處，改善個人的不當行為，以精益求精。抱有這種心態，便有利於未來升遷，有時具備一些隨機應變精神，也定能以智取勝。

"Increase and elevate, keep improving"

*- Increasing knowledge and self-cultivation
is the key to success*

"Gain" refers to time for progress; improve and elevate. What most people normally want to gain is material wealth and to enhance is mostly honorary status. However, this is by no means what a wise man does, nor is the original intended message of "Gain". What people most needed to increase is knowledge, and what needs to be improved most is self-cultivation of character. We may consider the advantage and think the same; by learning the strengths of others and improve on our own shortcomings or faults in thoughts and actions to excel. With a positive and humble mindset, one would be able to travel far and wide in bringing success to any endeavours. It is also advisable to have adventurous and conscientious spirit, so that we can win in face of any obstacles.
